

TABLE OF CONTENTS

	Page No.
INTRODUCTION	1
GEOGRAPHIC SETTING	2
Location	2
Physiographic Province and Climate	5
DATA GATHERING METHODOLOGY	9
GEOLOGY	13
HYDROGEOLOGY	18
Depth to Groundwater.....	18
Groundwater Flow Paths.....	21
Springs	23
Recharge	23
Discharge and Well Yields	26
Water Quality.....	29
GROUNDWATER AVAILABILITY AND DEMAND	31
Recharge	31
Recoverable Groundwater in Storage	31
Demand	34
AQUIFER MANAGEMENT	35
CONCLUSIONS.....	37
REFERENCES	39
SUPPLEMENTAL INFORMATION	
GEOLOGIC TIME SCALE.....	45

LIST OF FIGURES

Figure No.		Page No.
1	Study Area Location	4
2	Extent of the Chihuahuan Desert in the United States and Mexico	6
3	Average Monthly Precipitation.....	7
4	Regional Annual Precipitation (1961-1990).....	8
5	Located Well Data	10
6	Regional Geology	14
7	Topographic Relief	16
8	Depth to Groundwater.....	20
9	Regional Water-Level Elevations an Groundwater Flow Paths.....	22
10a	Water Level Hydrograph of City of Alpine Musquiz Well No. 11	25
10b	City of Alpine Annual Rainfall.....	25
11	Estimated Annual Average Recharge	32

LIST OF TABLES

Table No.		Page No.
1	Water Level and Water Quality Data for Inventoried Wells	11
2	Comparison of Winter and Summer Water-Level Measurements.....	19
3	Selected Public Water Supply Wells	27
4	Well Depths and Yields of Igneous Formations in Jeff Davis County.....	28
5	Igneous Aquifer System Water Quality	30
6	Projected Municipal Water Demand.....	34
